ACREAGE REPORTING MADE EASY

MyAgData® is a cloud-based application that automates the data collection and reporting process required by the USDA to satisfy conditions for crop insurance and FSA program participation.

MyAgData users can upload their precision ag data recorded during planting and harvesting to a system that delivers the data directly to their crop insurance agent and county FSA office. Just see your agent, get your report and head over to the FSA. It's that simple.

Not yet using precision ag equipment? No problem. You can easily manually upload your farm/tract/field information to be utilized for reporting in the same manner.

FAST. No more tedious manual outlining of field boundaries on a paper map.

EFFICIENT. Working during off-hours? Use MyAgData when it's convenient for you

**EASY.** Our platforms are designed for users of all tech skill levels.

ACCURATE. Field boundaries can be tied directly to your as-applied precision ag data.

MOBILE. MyAgData Mobile app lets you create complete reports in minutes from anywhere.

COMPLIANT. Reports are uneditable and locked as a source of truth after submission.

ACCEPTED. Our reports meet or exceed all USDA standards.

INTEGRATED. Works with your FMIS system. No additional hardware needed.

Smooth. Quick. Convenient. Practical. **MyAgData® Mobile** streamlines your data collection and acreage reporting for FSA programs and crop insurance.

Complete map-based acreage reports from wherever you are: in the field or back at the office. Our acreage reports meet or exceed all USDA regulations and standards and our maps are accepted by FSA county offices.

iOS? ANDROID? WINDOWS? Use the device of your choice. We support them all!

EFFICIENT. Log on and see your farm-tract-field information, select your crops, save and submit.

EASY. Our platforms are designed for users of all tech skill levels.

FAST. Got a signal? WiFi access? You can create and submit an acreage report.

> MyAgData is simply leading the pack when it comes to map-based reporting. They understand the complexities that can arise with geospatial data and have found a way to keep it simple without giving up full control or functionality. **Agent Travis from Minnesota**

Some common questions about MyAgData® Mobile, answered. If there's anything else you'd like to know, don't be shy. Email us at info@myagdata.com for more information!

Can I look at a mobile report on my office computer?

All the acreage reports you create or update in MyAgData® Mobile are immediately available in MyAgData web app. Likewise, any changes you make back at the office can be seen in our mobile app.

What kind of data are you sending to the government?

Nothing that doesn't already get sent for you to participate in FSA Farm Programs or crop insurance: date planted, crop planted, location. We're committed to maintaining the confidentiality, integrity and security of any data we receive.

How secure is the data I'm using with MyAgData?

MyAgData® is hosted in a federally certified Microsoft® Windows Azure data center that is highly scalable, secure, reliable and available.
