

### MyAgData® and the Cloud

An increasing number of agricultural industry organizations are offering their own proprietary cloud data storage solutions to make it easier to access your data and to enable increased collaboration.

Your as-applied planting data stored in an equipment manufacturer or third-party cloud can be pulled and used for your acreage report.

Here's how to connect them to MyAgData®.

1. On the Precision Ag page, select **Yes, my data is in a cloud**.

**Precision Ag** ?

Do you have any Precision Ag data to import or edit?

No, manually edit fields  
 Yes, my data is in a cloud  
 Yes, I have my data on my computer or on a stick

2. Click **Next**.
3. Choose your vendor from the list, then click **Connect**.

**Cloud Connect** ?

If the data in an equipment manager or 3rd party cloud, you can setup and manage your connections here.

As applied planting or yield manager data stored in an equipment manufacturer or 3rd party cloud can be pulled down from the cloud and used for your acreage or production report.

Press 'Next' to continue if your connections are setup or you don't wish to setup any connections.
